

The Multiwall width cutter saves time and money.

The machine cuts between two channels in the polycarbonate multiwall sheets. (Length direction)

Polycarbonate multiwall sheets are no longer cut to size with a saw but with a blade. This technique reduces noise nuisance to a minimum. An additional advantage is that no swarf at all is produced during cutting. These features add up to a clean and relatively quiet work area - reason enough to consider the Multiwall cutter a good investment.

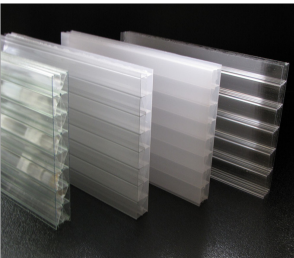

In addition to a swarf-free work area, the sheets remain dust-free owing to the use of cutters. You no longer have to take

time to blow the sheets clean with an air pistol.

The use of an air pistol unavoidably introduces all kinds of organic particles which can serve as a breeding ground for fungi. With the Multiwall cutter this problem too, is a thing of the past. You can now produce a cleaner product directly, with less work.

It is absolutely reliable and virtually maintenance free.

The Multiwall cutter enhances the quality of the work area and lowers labour costs. It is an investment that soon pays for itself.

Features:

- Razor-sharp cutter
- Simple operating panel
- Clean Cutting

Benefits:

- No damaged edges
- Easy operating
- No swarf, no air gun needed

Technical Specifications

Weight

Unpacked 1200 kg (2645 lb)

Dimensions

Depth 1200 mm (47,3 in)
Width 3000 mm (118,1 in)
Height 1350 mm (53,2 in)

Maximum speed

Cutting speed 25 m/min

Material limits

Maximum width 2100 mm (78,8 in)
Maximum thickness 40 mm (1,55 in)

Noise level

Less than 70 dB(A)

Utilities

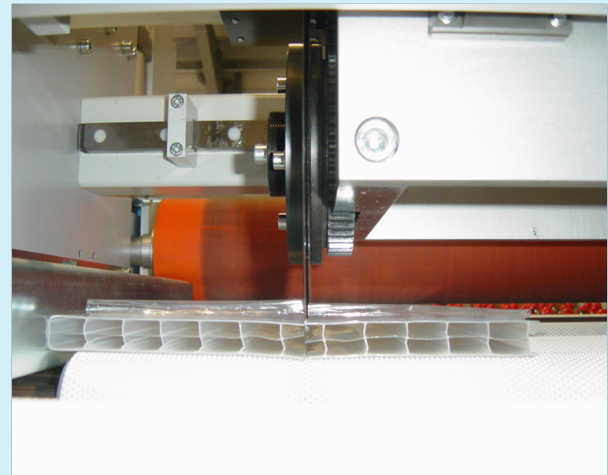

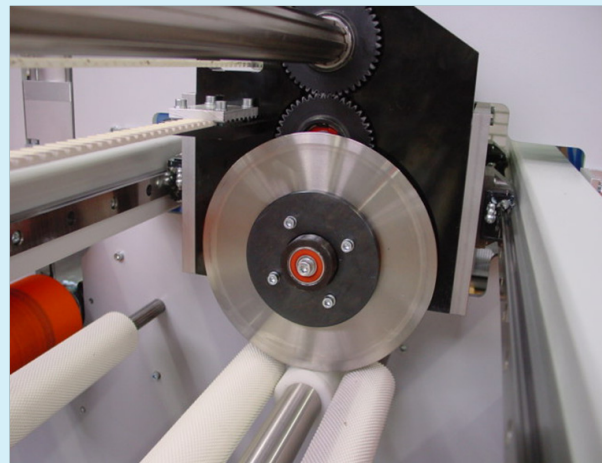

Compressed air 8mm Hose
Oil-free, water free, filtered
Minimal pressure: 6 bar (abs.)
Advised pressure: 8 bar (abs.)

Electricity 1/ N / PE ~ 230 VAC, 50Hz

Current 6,5A

Available options

- Infeed table (s)
- Outfeed table(s)
- Length measurement on in-/outfeed table

Details are correct at the time of publication.
