

## Stand-alone Hologram-unit

### Hologram hot stamping unit

This hologram unit is especially developed by Crest for hot stamping Hologram-logos onto licence-plates. Compared to the existing units on the market, this Crest Hologram unit has high cycle speed and maximum adjustment possibilities to the various dimensions of licence plates and hologram shapes and dimensions. Plate handling and positioning manually.

#### Features Hologram unit;

- Special developed for hologram stamping on licence plates
- Manual handling and positioning from licence plate.
- Max stamping dimensions 60 mm x 220 mm (2,36" x 8,67") (L x W )
- Max foil width 250 mm (9,45")
- Max roll diameter 140 mm (5,5")
- Inner core foil 25,4 mm (1")
- Production capacity 40 – 50 plates per minute (depending on foil brand)
- One inch (25,4mm) Auto-grip shaft for easy setup roll of foil
- Thermal isolated heating plate for energy saving and safety, heating power 1500 Watt
- Adjustable press-force
- Adjustable press-height
- Adjustable press-time
- Adjustable temperature setting controlled by digital PID controller up to 200 °C (392 °F)
- PLC controlled with interface for external control
- Digital operating panel with LCD display for adjusting settings
